

Tools required to create a Web Page

The following tools are required to create and view an HTML document:-

Text editor: - To create or compose HTML documents we need text editor programs.

Notepad & WordPad are two examples of text editor.

Web browser:- A Web browser is needed to view & display the HTML documents.

Internet Explorer, Mozilla Firefox and Google Chrome are few examples of Web Browsers.

Web Server (Optional):- This is required only if an HTML document has to be stored.
